## MCFT- Your Guide To Sign Solutions

w w w . v i s t a s y s t e m . c o m

We do it your wayfinding

# Experience The Vista

With Vista System, you get what is expected from a leading international sign manufacturer.

Availability of service through thousands of sign professionals worldwide.

MCFT - Modular Curved Frame Technology: A modular system with the ability to provide highly customizable solutions that meet the unique requirements of each sign project.

A modern, contemporary clean look.

Simple to use and easy to update by yourself.

Maximizing modularity with a wide range of sizes.

Providing a comprehensive solution with an unrivaled range of applications that covers the entire project for a competitive price.

High quality, 100% guaranteed product.

We hope you will enjoy our new guidebook, and find it useful and convenient.

As you may have noticed, we often mention in our literature that we operate according to the U&I business method. The U&I method was developed by us with a specific goal and is our promise to the market.

We strive to continually provide an "Unbelievable & Incredible" experience to our customers with everything we do.

Sounds overstated? Well, we mean it! We realize that our customers expect their service to improve and not decline.

We also understand that's exactly what gets us excited about being in business in the first place. The challenge of discovering just how far we can go to impress you, to excite and surprise you and to improve your well being as a result of doing business with us. Focusing on this goal requires our team to constantly work hard on improving, creating and generating new ideas as to how we can improve your well being. This type of focus and purpose generates a positive atmosphere amongst our company and makes it a great place to be.

We invite you to join our excitement!

MCFT is a new concept in the sign industry. MCFT was developed by experienced sign professionals with a goal to fill the gap between custom fabricated sign systems and modular sign systems. MCFT offers the best of both worlds by providing the consumer with all the advantages of a modern modular system, while at the same time, providing a custom solution for the unique requirements of each project. The result, a modular system with a custom fabricated look and capabilities.

MCFT offers flexibility when it comes to budgeting, by offering the ability to adjust the cost according to the level of customization.

What makes an MCFT system?

### Modular

Standard units that can be assembled in different ways using both standard and custom accessories and attachments.

### Curved

Today's design trend and a curved shape that keeps the insert material in place by using its own tension.

### Frame

Enabling the use of many types of sign substrates and inserts providing for easy and inexpensive updating of the signs.

### Technology

With MCFT, the sign-pro participates in the design and development of new ideas for new products and becomes an integral part of the development process jointly with Vista System by providing new ideas from the field that mirror market needs. These demands are supported by the quick fabrication capabilities of custom accessories and attachments that mesh with the system extrusions.

# Vista System Advantages

10EN-PH5

## Sign frame:

Vista System was originally designed as a sign frame holder for a wide range of applications. This gives Vista System a huge advantage over other sign systems. The system is designed to handle most applications and materials used in the sign industry. This includes printed-paper, engraved, embossed, screen-printed substrates, photo-metal, photo-polymer, vinyl graphics, photo-luminescent safety signs, tactile, and more. The materials used include polymers and metals of all types, plastics, paper, etc. Any material with flexibility and the correct thickness may be used as an insert with Vista System frames.

## Easy to adopt:

This means that Vista System is the easiest system for sign companies to adopt. There is no need to develop new technologies, but simply to incorporate existing technologies into the system.

## A wide range of sizes:

Vista System is the only system featuring more than 80 different extrusions, creating unlimited widths and shapes. This is more than five times the number of widths offered by any other MCFT system currently available. This wide choice of sizes and shapes allows the customer to stick to one sign system throughout a project, and to find solutions to almost any kind of sign required.

## Solutions and applications:

Vista System offers comprehensive solutions for suspended signs, flag signs, main directory signs, double sided pylons, triangle pylons, post signs, personal table signs, and many more. No other curved system can offer such a comprehensive solution.

## End caps:

Vista System offers both plastic and metal end caps. The end caps are available with screws for maximum security to avoid vandalism. Plastic caps are made of a custom formulated polymer of unique flexibility and resilience that can be painted. The metal end caps are made of aluminum with silver or black anodized finishes and include stainless steel screws.

## Screw bosses for structural purposes:

Vista System offers a revolutionary solution for attaching and installing signs with no need for the welding and/or building of metal construction for support. A system of massive channels (Screw Bosses) for screws are inside the extrusion itself, enabling the construction of an enormous selection of elements, within minutes and with out any welding or special tools.

## Separation strips:

Vista System offers an integrated system, which allows a sign to be divided into separate changeable slats within one sign.

## Guarantee:

Vista System is sold only under the brand name "Vista", only to the sign trade. Working this way assures sign makers that Vista System will not compete with them and that the project is done by professionals.

## Wall Signs

Create wall-mounted signs with the Vista frame extrusions using any flat, flexible substrate to produce a curved-face sign.

Substrates:

Paper + lens, engraving plastics, thin metals, laminates.

Compatible methods:

Cut vinyl, digitally printed vinyl, engraving, screen-printing and ADA.

10EN-PH6

Extrusion assemblies:

Available from 30mm/1.18" to 1200mm/48" wide.

Plastic end caps: Gray or black, up to V300 excluding V11.

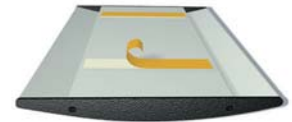

Metal end caps: Brushed silver or black from V60 and up.

Fabric Pin-Mount: A self-adhesive sign holder for Vista signs to be installed on fabric surfaces.

## Vista Light Wall Signs

The Vista Light used with or without lighting, provides the option to sandwich the graphics between a white translucent diffuser and a clear matte lens, both made from vandal proof polycarbonate.

Vista System frames are a perfect solution for posters, and provide POP advertising with enhanced visibility and beauty, thanks to the curved design of the frames. The option of backlit or standard wall frames provides an endless variety of sizes to match any project.

10EN-PH13A

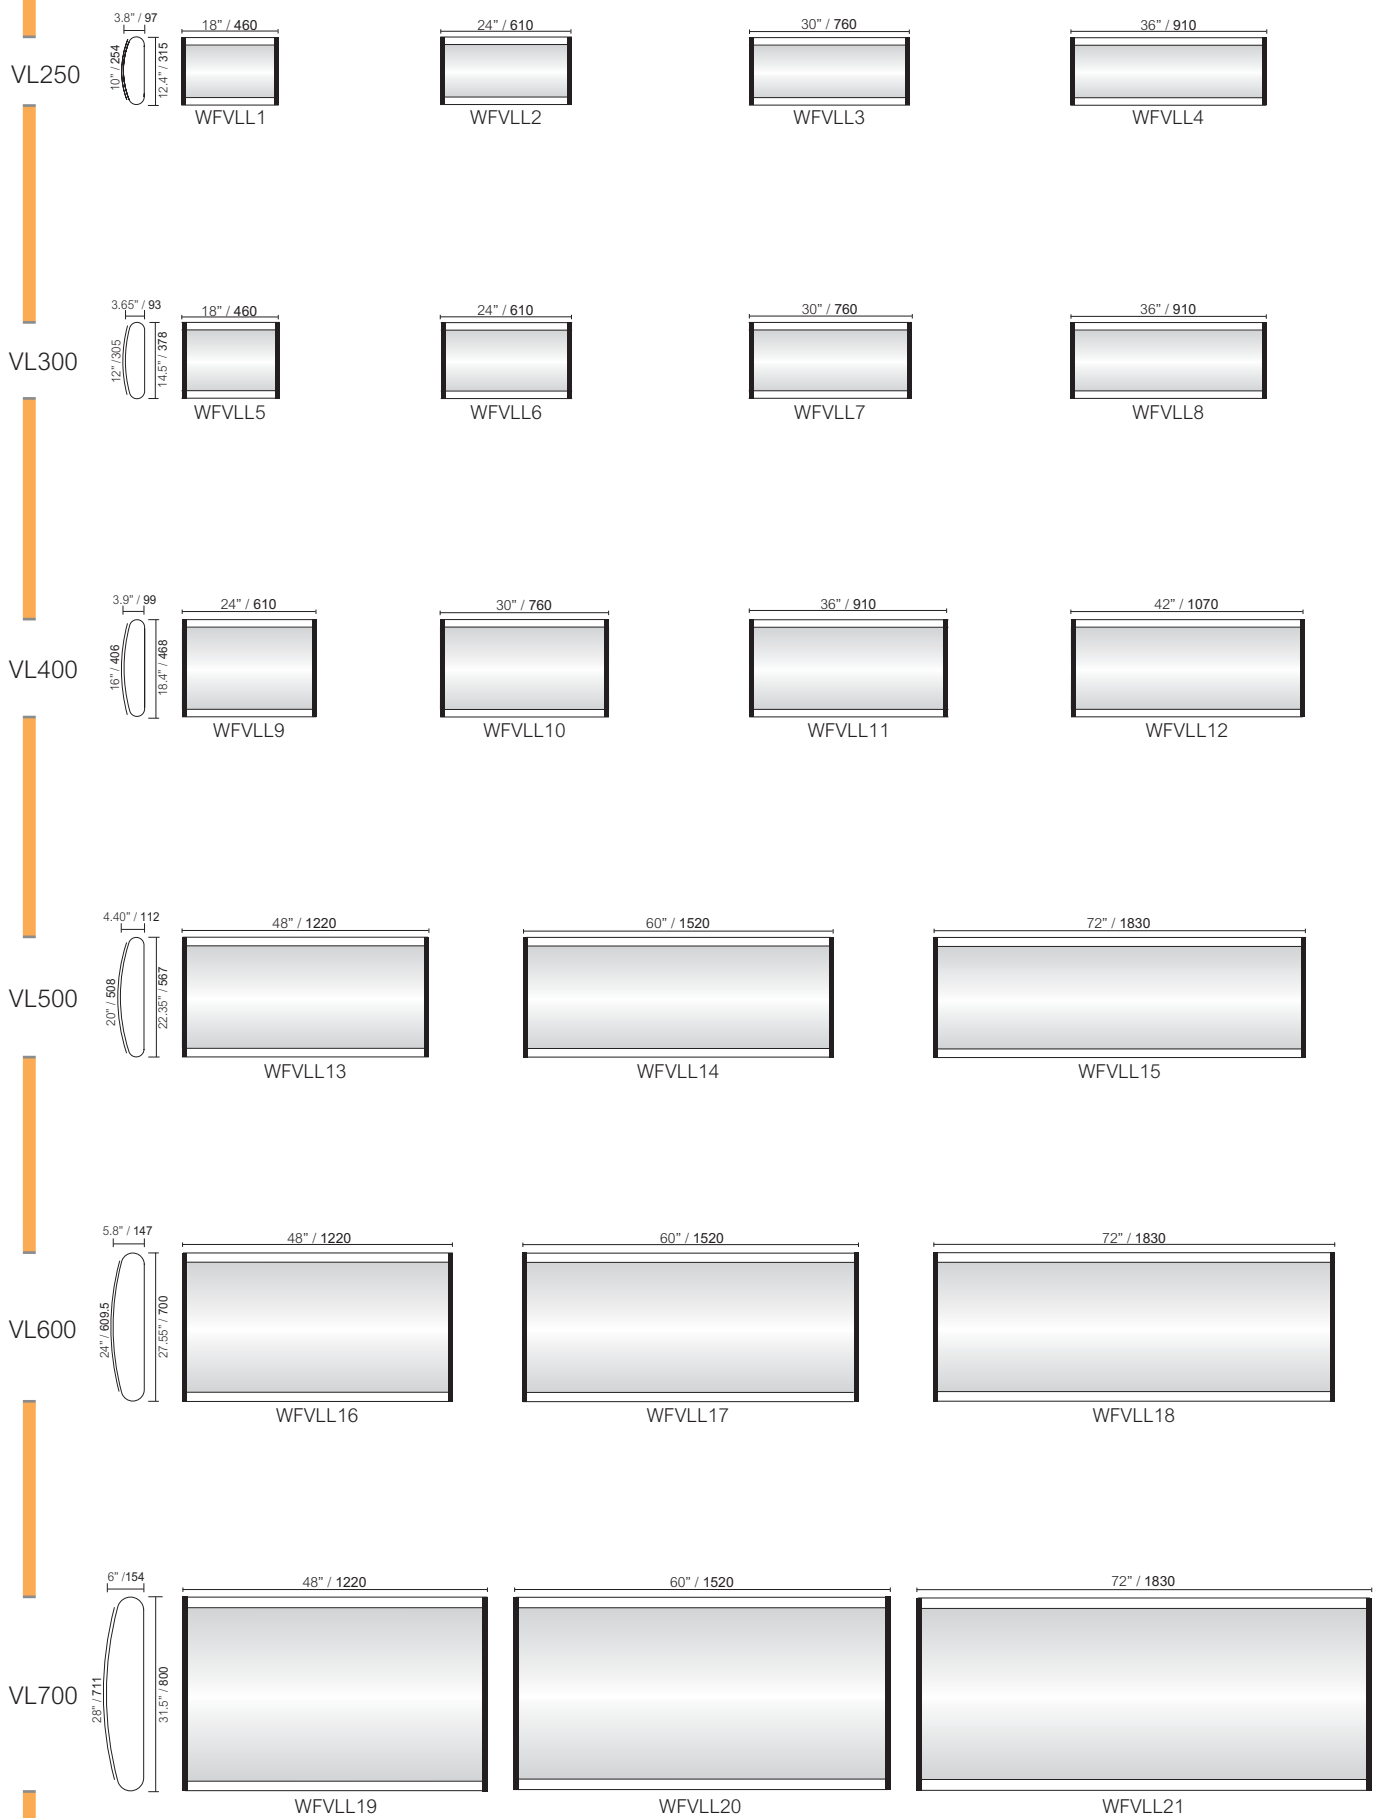

10EN-PH13

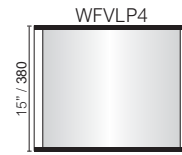

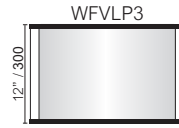

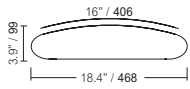

Standard finishes for Vista profiles are available in silver or black anodize.

Choose between black plastic end caps or silver and black anodized aluminum end caps.

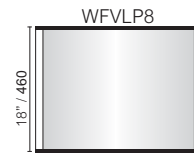

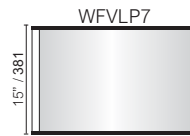

Custom sizes and finishes are available upon request.

VL500

VL600

VL700

## Projecting Signs

The wall brackets are designed to accept standard size extrusions.

The base is designed to mount on the wall using countersunk screws. The bracket fits on to the base and is secured with decorative nuts. Signs that project more than 4"/100mm into the path of travel, should be mounted at least 80"/2M from the floor.

Choose between standard steel and deluxe aluminum brackets.

Finish: Black powder coat.

10EN-PH16A

10EN-PH16

## Simple Base

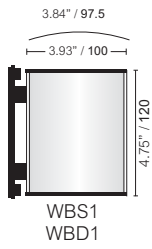

The simple base style projecting frames are similar to small pylon signs designed to be mounted flush to the wall. They are attractively priced and provide a clean, streamlined appearance. The simple base design can also be used as an overhead sign mounted to the ceiling.

## Directories

Vista System directories are fast, easy and simple to assemble and install. There is no need for special tools. The system has the advantage of flexibility to accept a variety of insert materials as well as the complete freedom to determine the height of each information strip, you decide how the sign will be sectioned by placing the separation strips as needed. Where? Wherever you decide, according to your design.

Building directories with the Vista System's Modular Curved Frame technology is easy!

10EN-PH22

### Separation strips:

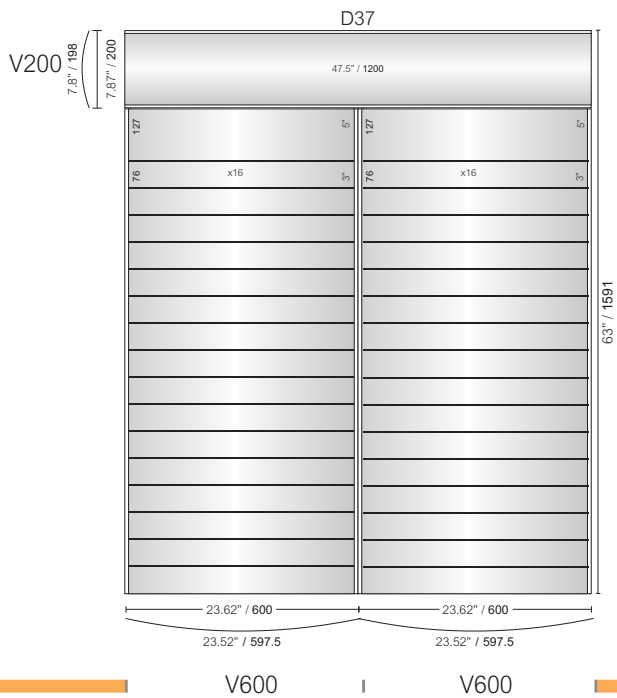

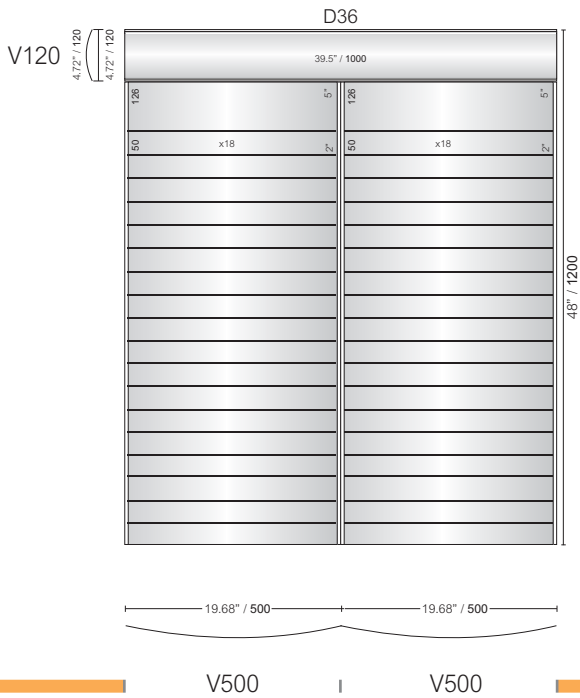

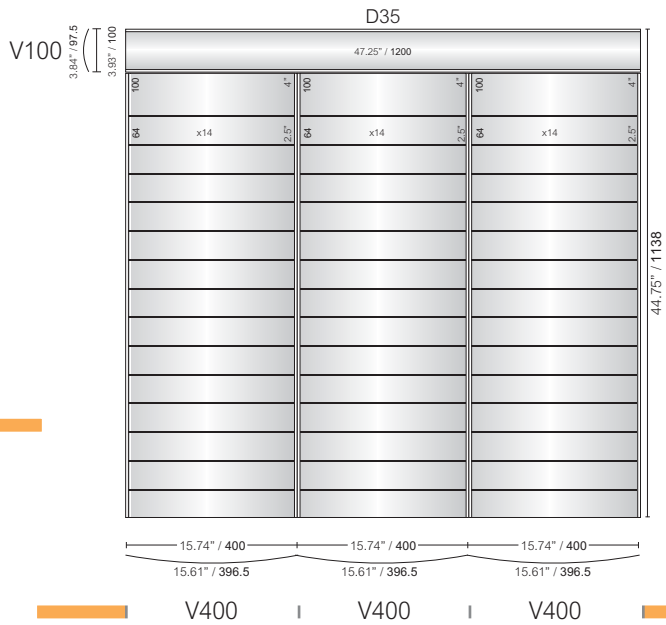

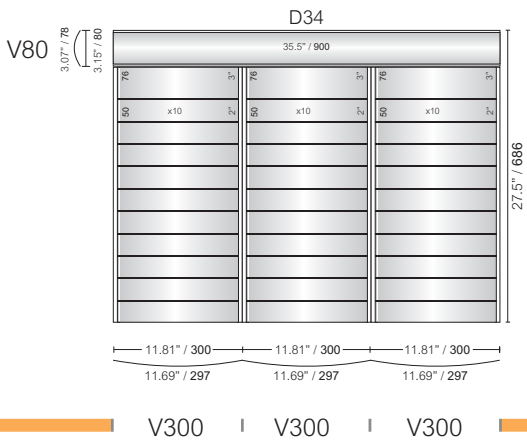

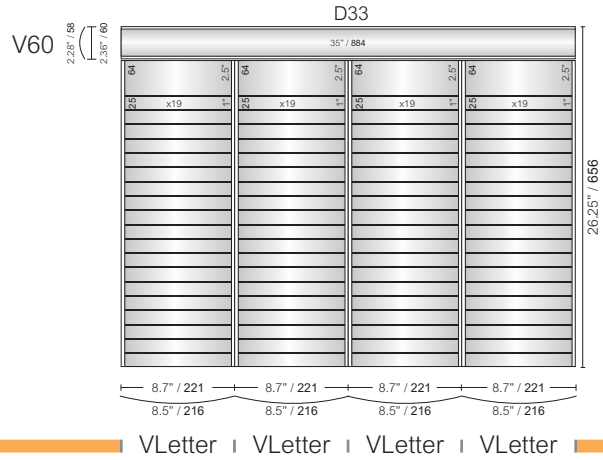

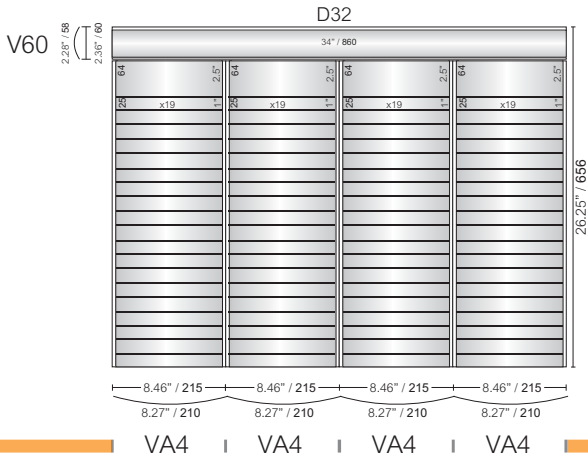

Vista System offers an integrated system, which allows a sign to be divided into separate changeable slats within one sign.

V14, V17 and V22 are not available with separation strips.

10EN-PH24A

## Directories

Vista System directory signs are easy to maintain and update.

The advantages of this simple system are flexibility when it comes to the overall width of the sign and the ability to add additional panels. It offers a perfect choice, since its' innovative design allows for easy installation, removal and replacement of the signage, even by a novice. Vista's wide-ranging system of contemporary curved framed technology is a key factor in the purchasing process.

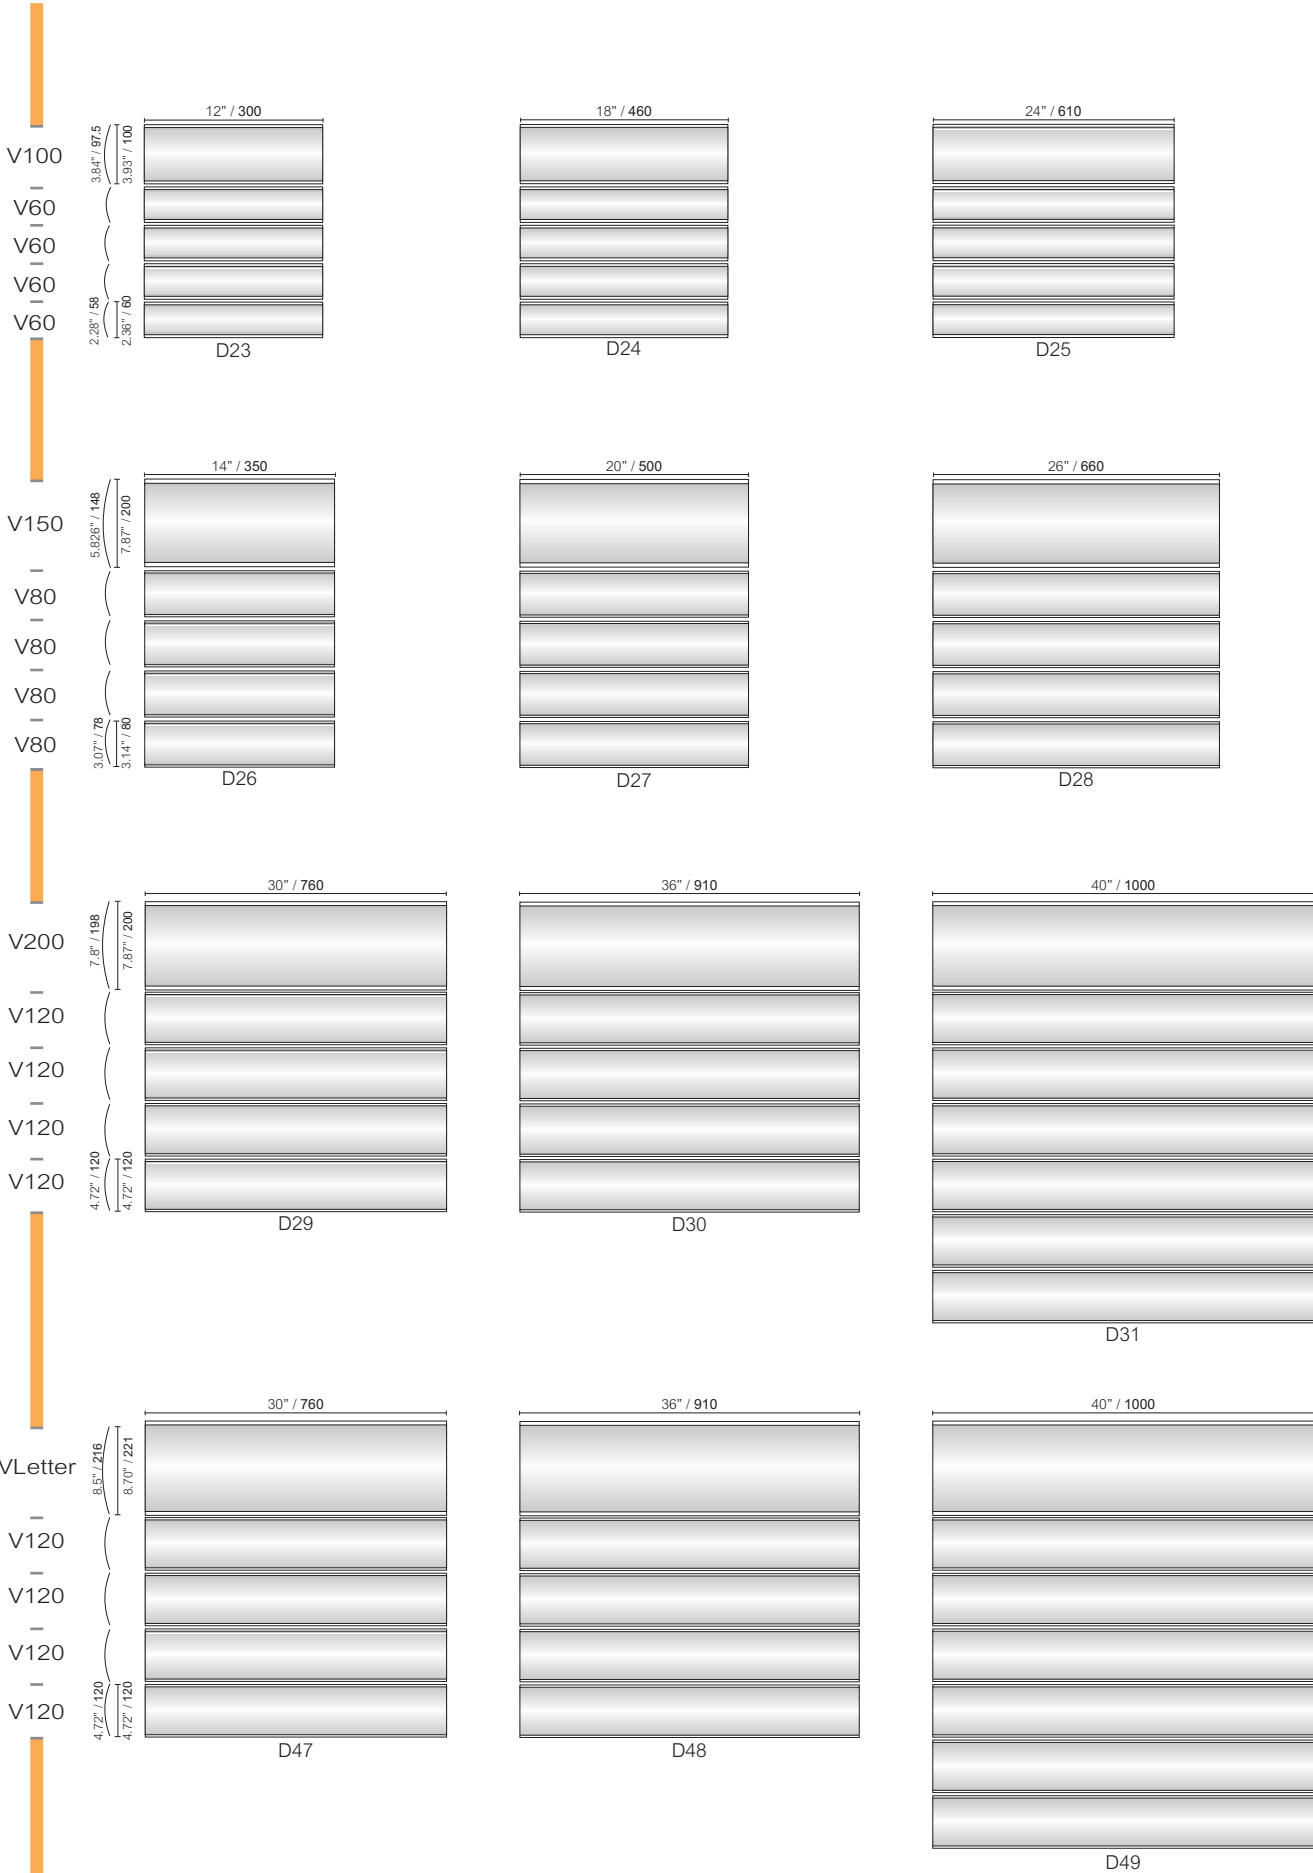

10EN-PH26A

10EN-PH26

Plastic end caps: Gray or black, up to V300 excluding V11.  
Metal end caps: Brushed silver or black anodize, from V60.  
Custom sizes, paint or anodize, are available.

## Table Stands

The “Kangaroo” table sign frame is offered as a complete package:

- Convex frame, aluminum base and end cap, clear/non-glare lens.
- Available in several sizes.
- Easy to assemble.
- Easy to change insert.
- Designed to accept standard paper or other sign substrates.

The Kangaroo sign frame offered in 10 different widths:

V60, V80, V100, V120, V150, V200, VA4, VLetter, V11, V300.

## Table Stands

The "Boomerang" sign frame is offered as a complete package:

- Convex frame, end caps, clear/non glare lenses.
- Available in several sizes.
- Easy to assemble.
- Easy to change insert.

Frames are offered in 10 different heights up to V300. Standard finishes are available in silver or black anodize. Custom sizes and finishes are available upon request.

10EN-PH30

## TS30

The TS30 is a three sided heavy table sign, offered as a complete package: 30mm/1.18" per side.

Plastic end caps are available in gray or black, supplied with three clear non-glare lenses.

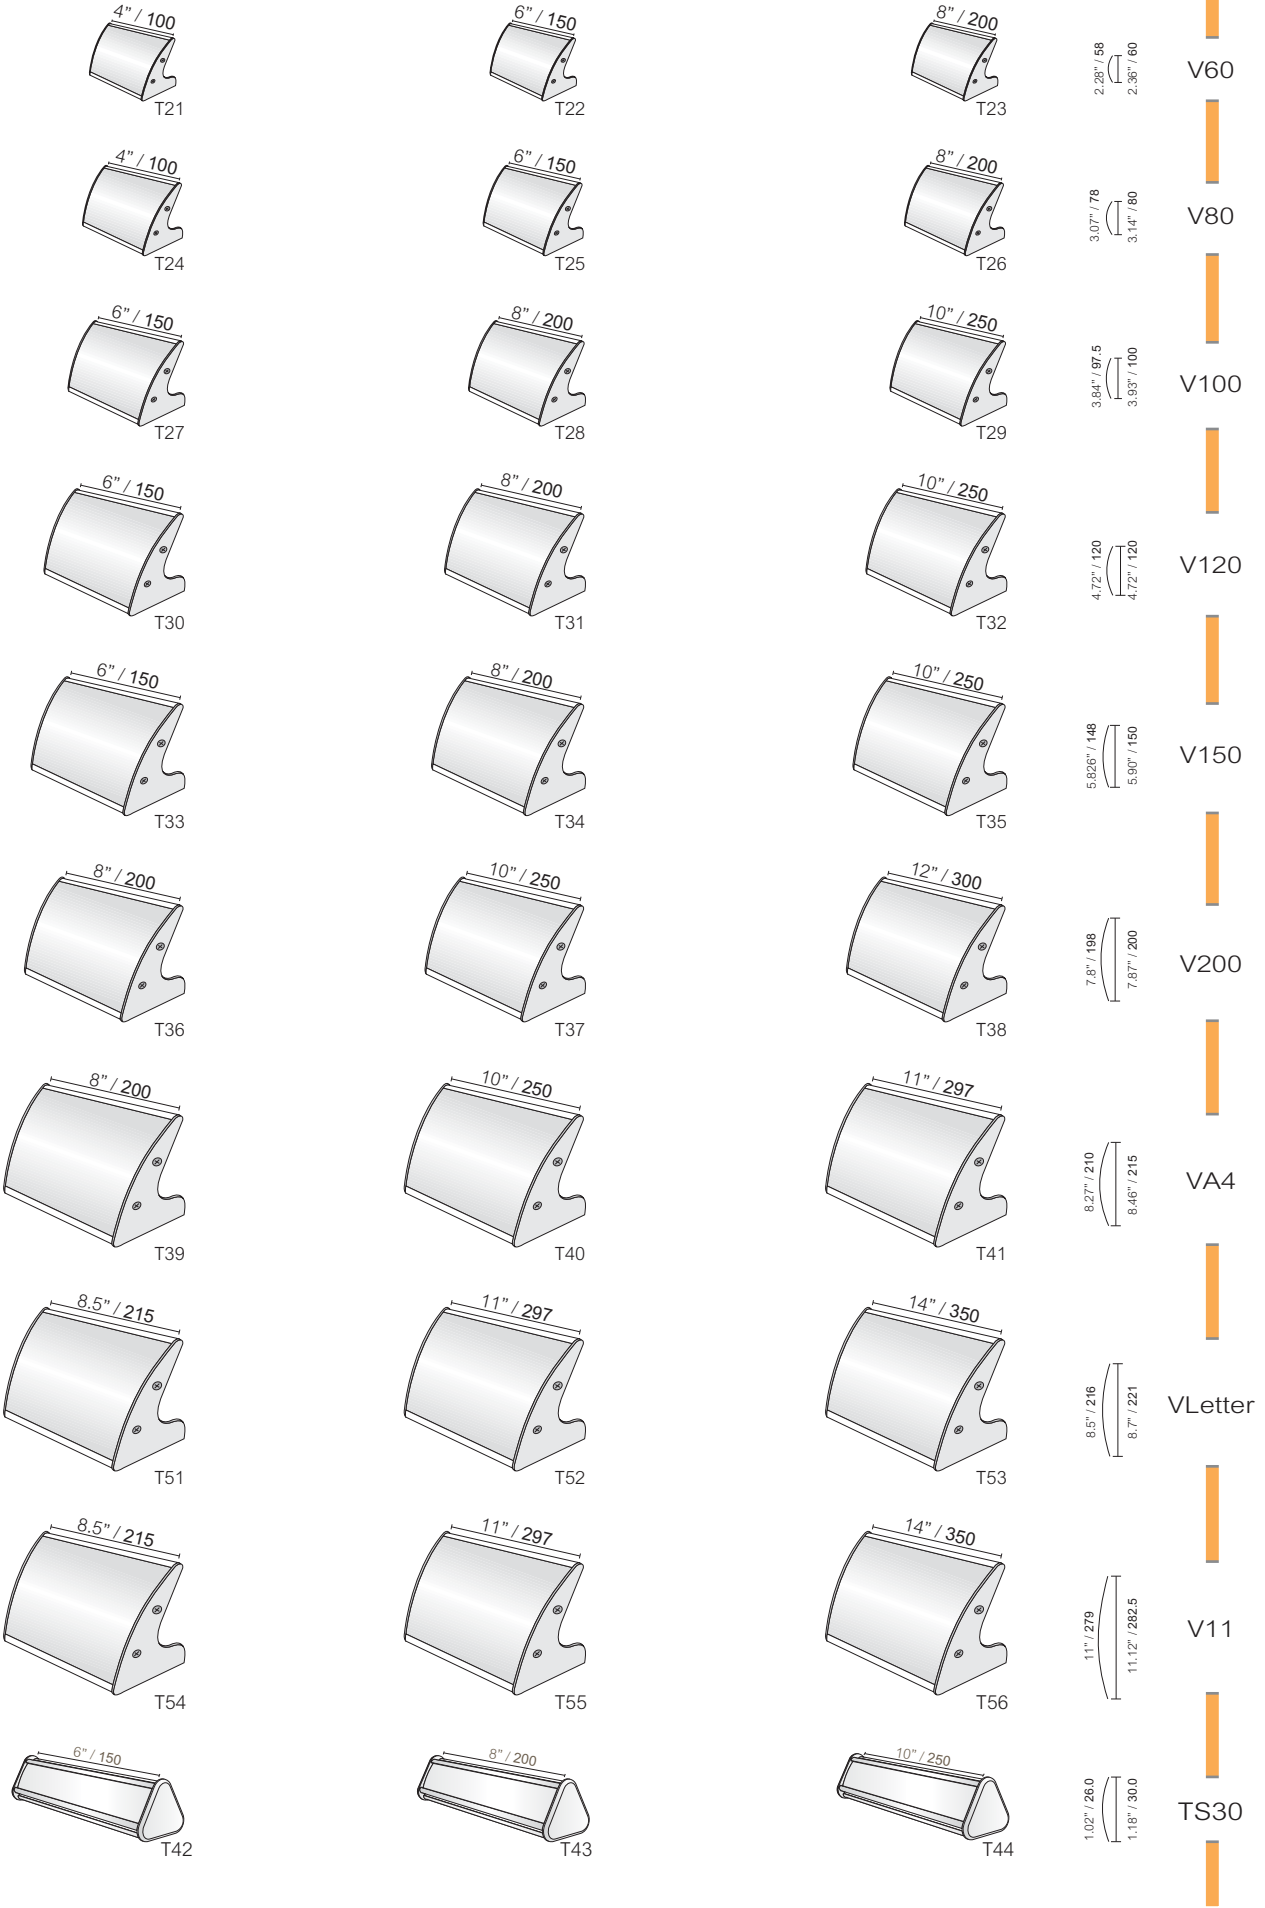

10EN-PH30A

The TS30 is available in clear or black anodize.

10EN-PH30B

## Double Sided Pylons

The system will accept a variety of standard inserts/substrates, including: paper, plastic, metal, laminates, sublimations, etc...

By adding Vista System divider strips, the towers can function as directories with changeable inserts.

Available in two basic designs:

The slim design is offered in 13 different widths from 150mm/6" to 600mm/24", and can be ordered in various heights to accommodate a wide range of applications. Bases are available for both permanent and portable applications.

10EN-PH32

Great for directories, show rooms, lobbies and displays in many environments, including car parks, airports, hospitals, office buildings, campuses, libraries and more!

## Double Sided Pylons

Vista system offers a range of bases and end caps that utilize the built in screw bosses allowing all sign holders to be assembled using only a screwdriver. This feature of the system is used to create freestanding convex, double-sided signs to be used with standard sign substrates, without interior illumination.

A wide range of sizes can be fabricated by expanding the extrusions to fit the standard bases and end caps.

The wide design is offered in 19 different widths from 150mm/6" to 1200mm/48" and can be ordered in various heights to accommodate a wide range of applications.

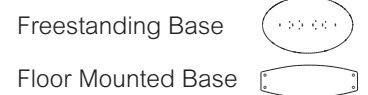

Bases are available for both permanent and portable applications.

10EN-PH34

Standard finishes for Vista profiles and metal end caps are available in silver or black anodize.

Custom sizes and finishes are available upon request.

Suspended signs - Horizontal Curve

## Suspended Vista Light

The Vista Light series provides a great solution for suspended signs with or without internal illumination. The system is lightweight and available in a variety of sizes. Simply insert any flexible material between the extrusions.

The Vista Light system provides solutions for both horizontal and vertical curve configurations.

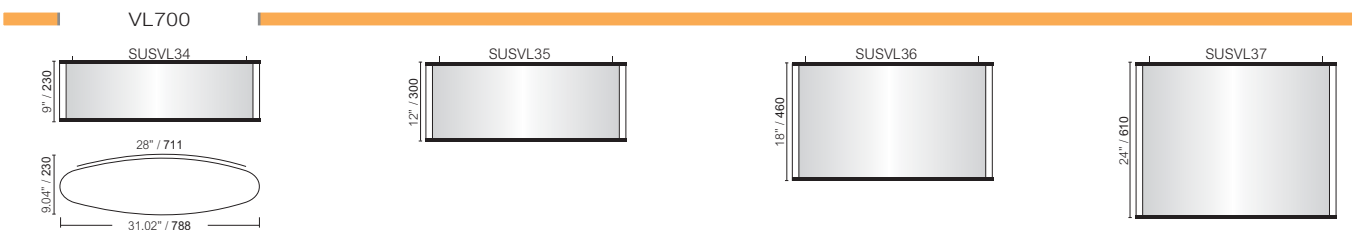

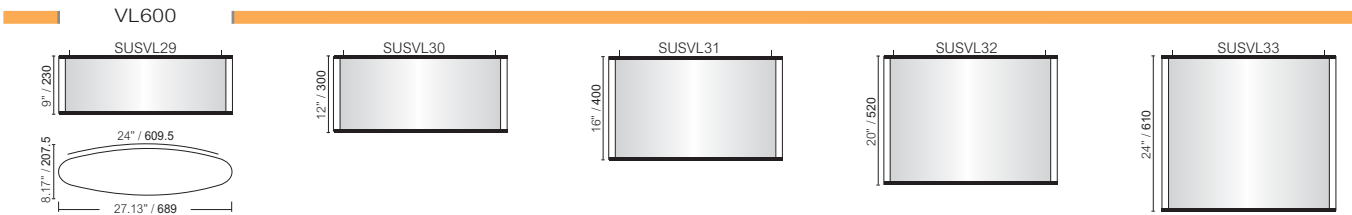

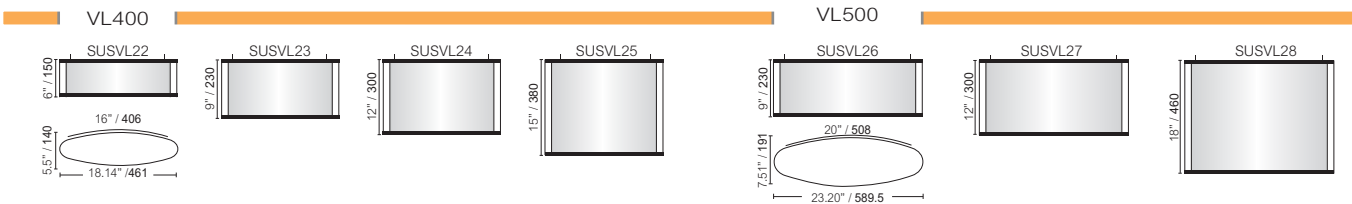

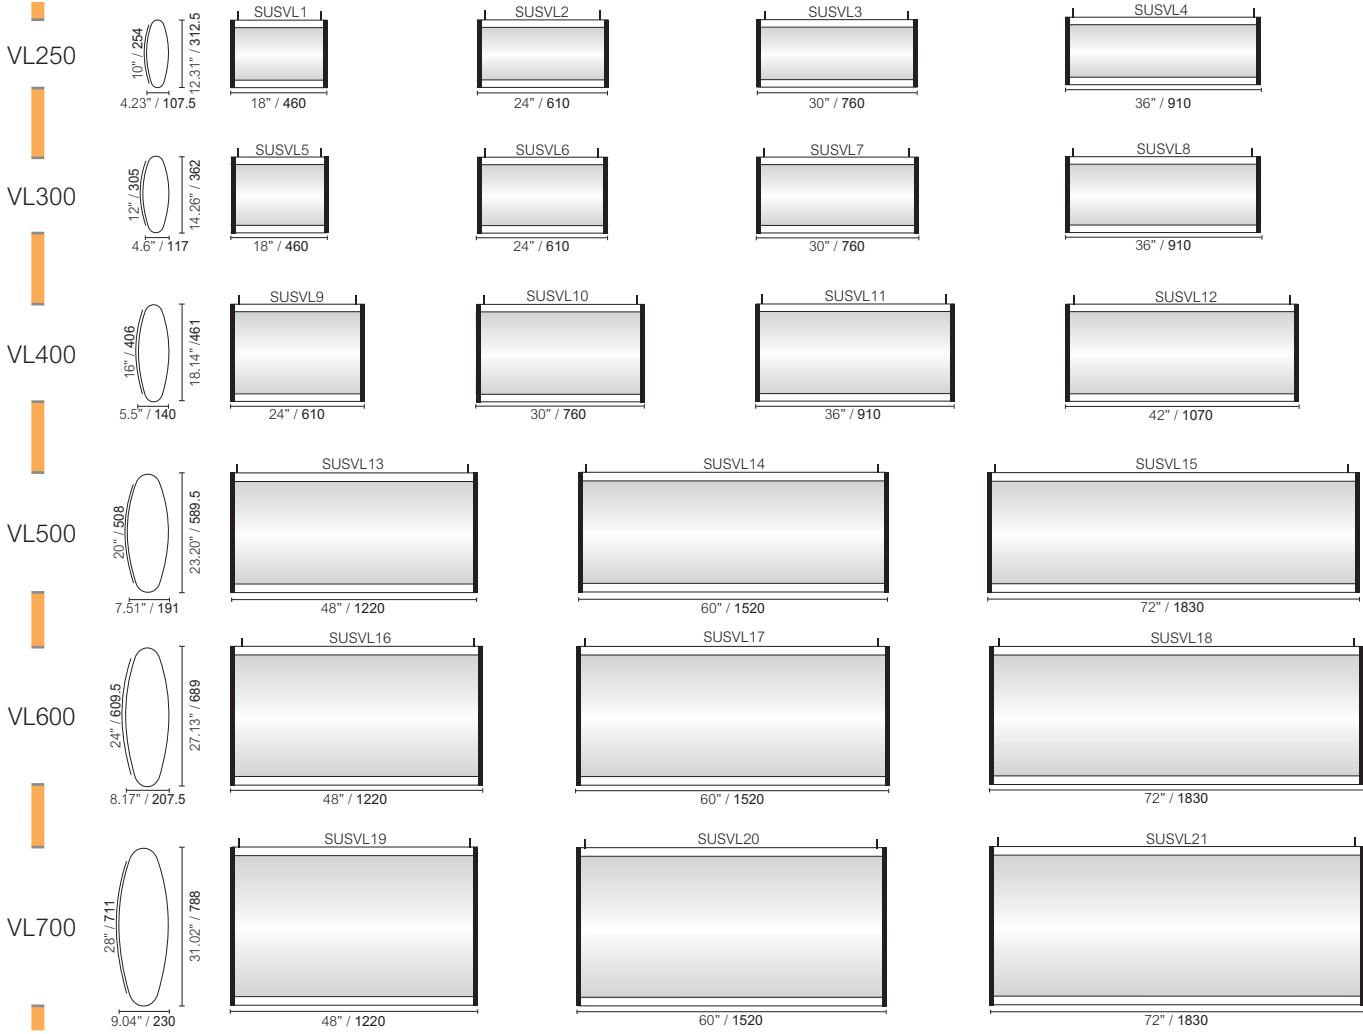

10EN-PH40

10EN-PH40A

Standard finishes for Vista profiles are available in clear or black anodize. Choose between black plastic end caps or silver and black anodize aluminum. Custom sizes and finishes are available upon request.

## Double Sided Post Signs

Vista's stylish posts are shown supporting a double sided sign with side-by-side posts, all Vista sign holders accept any sign material that is flat and flexible!

Sign frames and base heights are adjustable. Post components can be used in combination with the system's wide selection of standard parts.

Bases are available for both permanent and portable applications.

10EN-PH42

Standard finishes for Vista profiles and metal end caps are available in silver or black anodize.

## Triangular Pylons

A triangular pylon, utilizing short sections of Vista post extrusions between frame sections to create an attractive way-finding system.

With Vista, customized signs are affordable. By using standard extrusions and components, custom designs are cost effective. Our staff will assist you in creating the product you need. Assembly is simple, and the only tool required is a screwdriver.

Bases are available for both permanent and portable applications.

## Triangular Pylons

Create freestanding, convex triangular pylons using the standard Vista extrusions joined with a series of matching end caps and bases.

This cost effective frame system allows the use of standard substrates such as: plastics, metals, and paper. Create your own graphic signs and then flex and pop them in! When it's time to change the graphics, just pop them out again with the Vista Key suction cup.

The clear, non-glare lens provided by Vista can be used as a substrate for your vinyl graphics, or placed over printed paper inserts (paper should only be used indoors).

Bases are available for both permanent and portable applications.

## Vista Light Pylons

This system is used to create freestanding, convex, double sided signs that can be backlit with the addition of interior illumination, or used with standard signs substrates without illumination.

The unique design of the system allows the use of two panels for inserting artwork that needs to be changed out often, such as posters.

## Custom Displays

Custom kits and samples are available upon request.

Special display kits are available to accommodate your needs and budget. Call for more information.

## Samples And Display Kits For The Sign Pro

### Why Samples and Display Kits?

Professional sales tools are one of the key factors in promoting your business. At Vista System, we have made a special effort to create sales sample kits to fit both your needs and budget. From our experience the most effective sales tool for Vista System is a display of actual signs presented in your business display area.

The display kits offered come with changable inserts, ready for you to provide the graphics of your choice.

We encourage you to experiment with different types of inserts to create an interesting and versatile display.

## C8 - Display Panel

### Showroom Display Board:

An attractive assortment of 8 Vista signs mounted on display board, ready to mount in your show room or lobby. This kit will enable you to show Vista System to your potential customers and add value to your current display area.

## Promo - Promotional Kit

100 customized samples to hand out to your customers, including the Vista suction tool. The samples are made of V80x3.14"/80mm or V100X 2.36"/60mm and include personalized graphics to include your company logo and information. There is a detailed label on the back of the sample with your company contact information. This is a great way to market and promote your company, with a practical and useful marketing tool that you leave with potential customers as a calling card.
